PROFESSIONAL SUMMARY

As a software engineer and a full-stack developer, I possess strong solid expertise in the MERN stack, React Native, TypeScript, and RESTful APIs. I am adept at designing scalable backend architectures, in optimizing database queries (for MongoDB and MySQL), and building implementing responsive, user-focused mobile and web applications. I have a strong command of data structures, algorithms, and core computer science fundamentals, along with a proven record of delivering production-ready projects.

SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Go

Frameworks: React.js, Node.js, Express.js, React Native, Bootstrap, Tailwind CSS

Cloud/Databases: MySQL, MongoDB, AWS (Basics)

APIs & Services: JWT, Cloudinary API, RESTful APIs, Multer

IT Constructs: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Developer Tools: Git, GitHub, VS Code, Postman, Android Studio, Docker

Soft Skills: Communication, Teamwork, Problem Solving, Time Management

PROJECTS

University Resource Portal | MERN Stack | GitHub Repo | Live Demo

Jan 2026 – Feb 2026

- Designed and deployed a full academic platform on the MERN stack, organizing the content into four hierarchical levels (Course > Branch > Year > Subject).
- Built a secure one-time-password admin authentication system based on secure one-time passwords using JWT and integrated the Cloudinary API with a full-featured CRUD admin console in order to streamline document management.

YouTube Backend Clone | JavaScript, Node.js, Express.js, MongoDB, JWT | GitHub Repo

Aug 2024 – Oct 2024

- I built and executed the development of a RESTful API architecture that managed all the CRUD operations for users, video pipelines, playlists, and interactive comments.
- To support secure media uploads, Multer was integrated with the Cloudinary API; optimise the MongoDB aggregations for view metrics were optimised, and secure session management was implemented by using JWT and bcrypt.

Bookworm App | React Native (Expo), Node.js, Express.js, MongoDB | GitHub Repo

Apr 2026 – May 2026

- I coded a full-stack mobile application for sharing books, leveraging Expo for navigation, offering user authentication, and incorporating a social feed where users can publish interactive book posts.
- I integrated the Multer and Cloudinary API for media uploads, built CRUD operations governed by user permissions, and optimised MongoDB sorting to retrieve the feed with low latency.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

2023 – 2027

Bachelor of Technology in Civil Engineering

Inter Science College, Jharkhand

2022

Class XII, JAC Board | Percentage: 81%

DAV (Dayanand Anglo-Vedic) Public School, Jharkhand

2020

Class X, CBSE Board | Percentage: 75%

EXPERIENCE

Team Lead – Virtual Lab Simulation / Ebootathon (IIT Kanpur Bootcamp)

Jan 2025 – Feb 2025

- Led a team of five engineers in designing and constructing of an interactive Virtual Lab Simulation platform intended for use in online practical demonstrations.

POSITION OF RESPONSIBILITY

Student Member, Training & Placement Cell

Aug 2025 – Aug 2026

- Carried out coordinated on-campus recruitment activities for more than 15 companies and assisted to over 250 engineering students with regard to their interview preparation and placement.

ACHIEVEMENTS

- Earned 3rd place in an Inter-College Hackathon and was chosen among the Top 20 teams at Smart India Hackathon.
